

“Concealed Hinge 2D”

A new generation of concealed hinges for steel doors

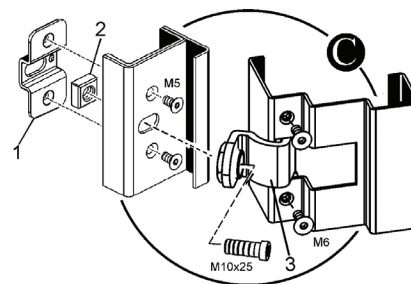

Installation - The "Concealed Hinge 2D" features a patented system for connecting and adjusting the door to the frame, making installation quick and efficient.

2D - Adjustments in 2D can be made easily using custom keys without having to remove the door.

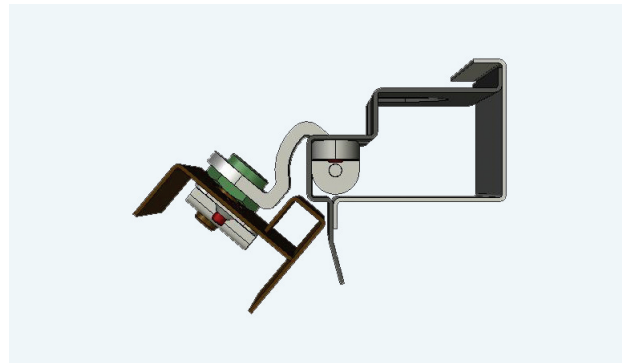

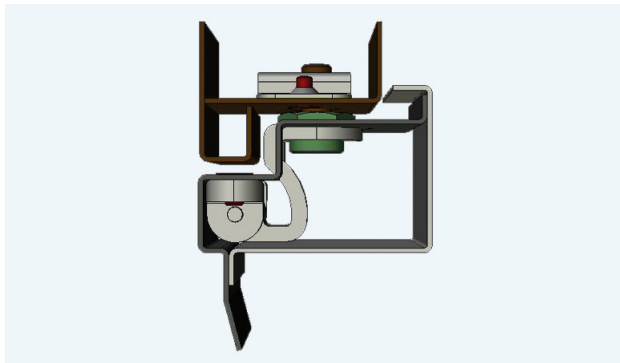

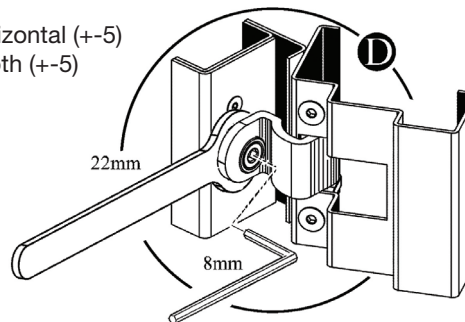

Security - Made of casting steel with the combination of its unique hidden mechanism, provides maximum protection against cutting or breaking.

Capacity - The design and construction of the hinge, enables the hinges system to hold a door with 2 hinges up to 80Kg, 3 hinges up to 120Kg.

Installation
